Team Size : 11

RESPONSIBILITIES

- Designed and implemented layouts and UI components based on client requirements and wireframes.
- Developed scalable web application modules using React JS, Redux, and React Hooks with best practices for performance.
- Created reusable components class-based and functional components to improve code reusability and maintainability.
- Built responsive web pages using HTML5, CSS3, and Material UI Framework, ensuring consistent UI across devices.
- Collaborated with UX/UI designers to translate design concepts into interactive and accessible web modules.
- Led a team of 2 front-end developers by assigning daily tasks, reviewing their code, and reporting progress to the Team Lead.
- Integrated front-end components with back-end RESTful APIs, working closely with backend developers to resolve issues.
- Committed code changes, raised Pull Requests (PRs), and reviewed/approved PRs of other developers using Azure DevOps to ensure code quality and maintainability.
- Identified and fixed cross-browser compatibility issues, ensuring support for major browsers like Chrome, Firefox, Safari, and Edge.
- Worked closely with QA teams during all testing phases to analyze, troubleshoot, and resolve bugs efficiently.

- Optimized application performance by implementing lazy loading and code splitting.
- Prepared and shared daily status updates with the client and stakeholders, ensuring clear communication of project progress.
